

Centura Health and UnitedHealthcare are partnering for a health plan designed to be different from the start.

**Lower cost, 24/7 access to care —
introducing Colorado Doctors Plan.**

Welcome to a new health plan that's built around deepening the relationship between your employees and their primary care physicians (PCPs) — with the goal of stronger engagement and more complete preventive care.

It's a more personalized approach, too, designed to make the health care experience easier for employees, with personal health records that include their history, medications, health goals and more — **all of which help doctors, network-wide, coordinate employees' care.**

**Low out-of-pocket costs
for employees:**

\$0 copay
PCP
visits

\$0 copay
urgent
care

\$0 copay
online
doctor
visits

Experience the Colorado Doctors Plan difference.

Lower costs.

Providing more ways for you and your employees to save.

Keep costs low with:

- Market-competitive premiums.
- \$0 copay on PCP visits, which can help employees remove perceived barriers — and encourage them to see their PCP more regularly.
- Low out-of-pocket costs for employees, with \$0 copays for urgent care and online doctor visits.
- PCPs who understand your employees' health and health plan, guiding them toward the care they need and helping them avoid cost surprises.

Control costs with:

- Easier-to-use digital tools that help employees find care providers in the network, manage claims and pay providers online.
- An automated text delivered to employees when they enter an ER that, if appropriate for their health needs, offers them recommendations to other immediate, less expensive care options — such as nearby urgent care centers, online doctor visits or same-day appointments.
- Personalized videos that explain your employees' benefits and help them understand their claims.

Easier to use.

Built with simplicity, efficiency and convenience in mind.

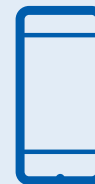

- Easier-to-use online resources — like doctor photos, profiles and practice descriptions that help employees find a PCP that fits.
- With support from clinical resources, programs and analytics, PCPs manage your employees' care throughout the system — making it easier for your employees to get the care they need.
- PCPs help connect employees to their plan benefits, and work to bring them greater convenience using tools like a prescription checker that helps eliminate hassles at the pharmacy.
- Easier administration for employers, with support from a dedicated team and robust reporting provided by UnitedHealthcare.
- Ask Amazon Alexa to open the new QuickCare Finder™ skill by UnitedHealthcare. Alexa helps determine the care that best fits your situation — and even directs you to the nearest location.

24/7 access.

Flexible and convenient ways to access care round-the-clock.

- Same-day/next-day PCP appointments so employees can get care quickly.
- Online appointment scheduling that's as convenient as it is easy.
- 24-hour access to a nurse via phone — so employees can get answers to health questions anytime.
- 24-hour online doctor visits — for doctor support anywhere, anytime.

Contact your broker or UnitedHealthcare representative for more information.

Employees can choose care from leading doctors.
